INTERNATIONAL JOURNAL OF GLOBAL HEALTH AND HEALTH DISPARITIES 2007

Volume 5

Number 1

The *International Journal of Global Health and Health Disparities* is a peer-reviewed international journal dedicated to studying public health issues that affect refugee, immigrant, minority, rural, and other diverse and underserved populations. Published by UNI ScholarWorks, 2007. The journal examines the effects of public health efforts on disparate populations, as well as methodology for providing effective public health programming with at-risk communities.

PROJECT EXPORT CENTER OF EXCELLENCE FOR HEALTH DISPARITIES

The mission of the University of Northern Iowa (UNI) Center for Health Disparities is to provide academic leadership in addressing health disparity issues among refugee, immigrant, minority, and rural populations. The UNI Center of Excellence, which is funded by the National Institutes of Health, accomplishes this mission through establishing model community-campus partnerships in outreach, research, and training on diversity and health issues.

GLOBAL HEALTH CORPS

The Global Health Corps was founded in the Division of Health Promotion and Education at the University of Northern Iowa in 1996. The mission of the Global Health Corps is to train university students in conducting culturally-appropriate public health programs with underserved and diverse communities in the United States and abroad, thereby improving the well-being of at-risk populations through disease prevention and health promotion.

The New Iowans Program at the University of Northern Iowa is funded by the United States Department of Labor. It provides statewide leadership in acculturation and worksite issues that affect newcomers in Iowa and the communities that serve them. It has conducted multiple training, education, publication, and research projects on issues related to rapid ethnic diversification.

The Center for Social and Behavioral Research has been operating at the University of Northern Iowa for several decades. It has an outstanding reputation for conducting innovative and important research for non-profit agencies, county and state organizations, and federal agencies on a wide variety of public health and related topics.

The University of Northern Iowa is one of three state-supported universities in the Iowa Regents system. A campus-wide commitment to putting students first lies at the heart of the University of Northern Iowa's reputation for providing exceptional education for its students. Building on its historic excellence in teacher education, the university has developed outstanding programs in business, natural sciences, humanities and fine arts, and social and behavioral sciences. The university places strong emphasis on experiential learning, and has many opportunities for international study. UNI prides itself on providing a student-centered educational experience, and is ranked as one of the best colleges and universities in the Midwestern United States.

NATIONAL INSTITUTES OF HEALTH, OFFICE OF MINORITY HEALTH AND HEALTH DISPARITIES

The National Center on Minority Health and Health Disparities (NCMHD) promotes minority health and leads, coordinates, supports, and assesses the NIH effort to reduce and ultimately eliminate health disparities. The NCMHD works independently and in partnership with the NIH institutes and centers and with other federal agencies and grassroots organizations in minority and in other medically underserved communities to: conduct and support basic, clinical, social and behavioral health disparities research and research training; strengthen the infrastructure of qualified research institutions that conduct health disparities research and training; provide endowments at centers of excellence; repay the educational loans of culturally competent researchers who agree to do clinical research; increase the numbers of minorities and other medically underserved populations in clinical research; and promote outreach and the dissemination of health information to medically underserved populations.

PUBLICATION POLICY

The International Journal of Global Health and Health Disparities welcomes unsolicited manuscripts. Authors should send their manuscripts to the editorial office at the address below. Guidelines for authors can be found in this issue as well as at www.globalhealthcorps.org, or can be obtained by writing to the editorial office. Issues of international, minority, and global significance for public health are of particular interest.

Views expressed in the journal are those of the authors and do not necessarily reflect the views of the International Journal of Global Health and Health Disparities editors, editorial board, or other members.
